DESCRIPTION

Lumber—Every piece of lumber in every model cabinet we make is not only kiln dried and cured but also steamed. Each piece of solid lumber is hand faced to take out the warp. The walnut we use is panel stock, that means that every board is selected out of the piles of the best grade walnut obtainable. Our Premier and Marvel cabinets are built up of 5-ply veneered stock. All tops of the Marvel and Premier cabinets are figured walnut such as is used only in the highest grade furniture. The ends are 5-ply plain walnut stock. Our imitation walnut cabinets are made from straight grain poplar, not gumwood or birch.

Finish—All our cabinets go through 15 operations in the finishing alone, nothing but genuine lacquer and genuine shellac is used, and to get a good finish the highest grade is necessary. All cabinets are hand rubbed, also polished. They feel and are smooth as glass. The color is a rich furniture walnut.

Construction—All joints where possible are double locked, glued and nailed, and all workmanship in general is strictly first class, and we assure you that every cabinet is a real cabinet job.

Shipping—We advise shipping by express on account of less breakage.
